

## TPG Internet Users Currently Have Problems Accessing EMail

Customers connecting via TPGi in Australia are currently having problems connecting to the mail server on the old linux server (blueskyhost.COM).

If you are having trouble accessing your email, please try using your webmail interface, or if you don't have one you can use <http://www.blueskyhost.com/webmail> (please note that if you use this you should go to Options -> Personal Information and enter your Email Address before sending any mail).

We are working to resolve this problem with TPGi.
